

SAVE OR SAFE?

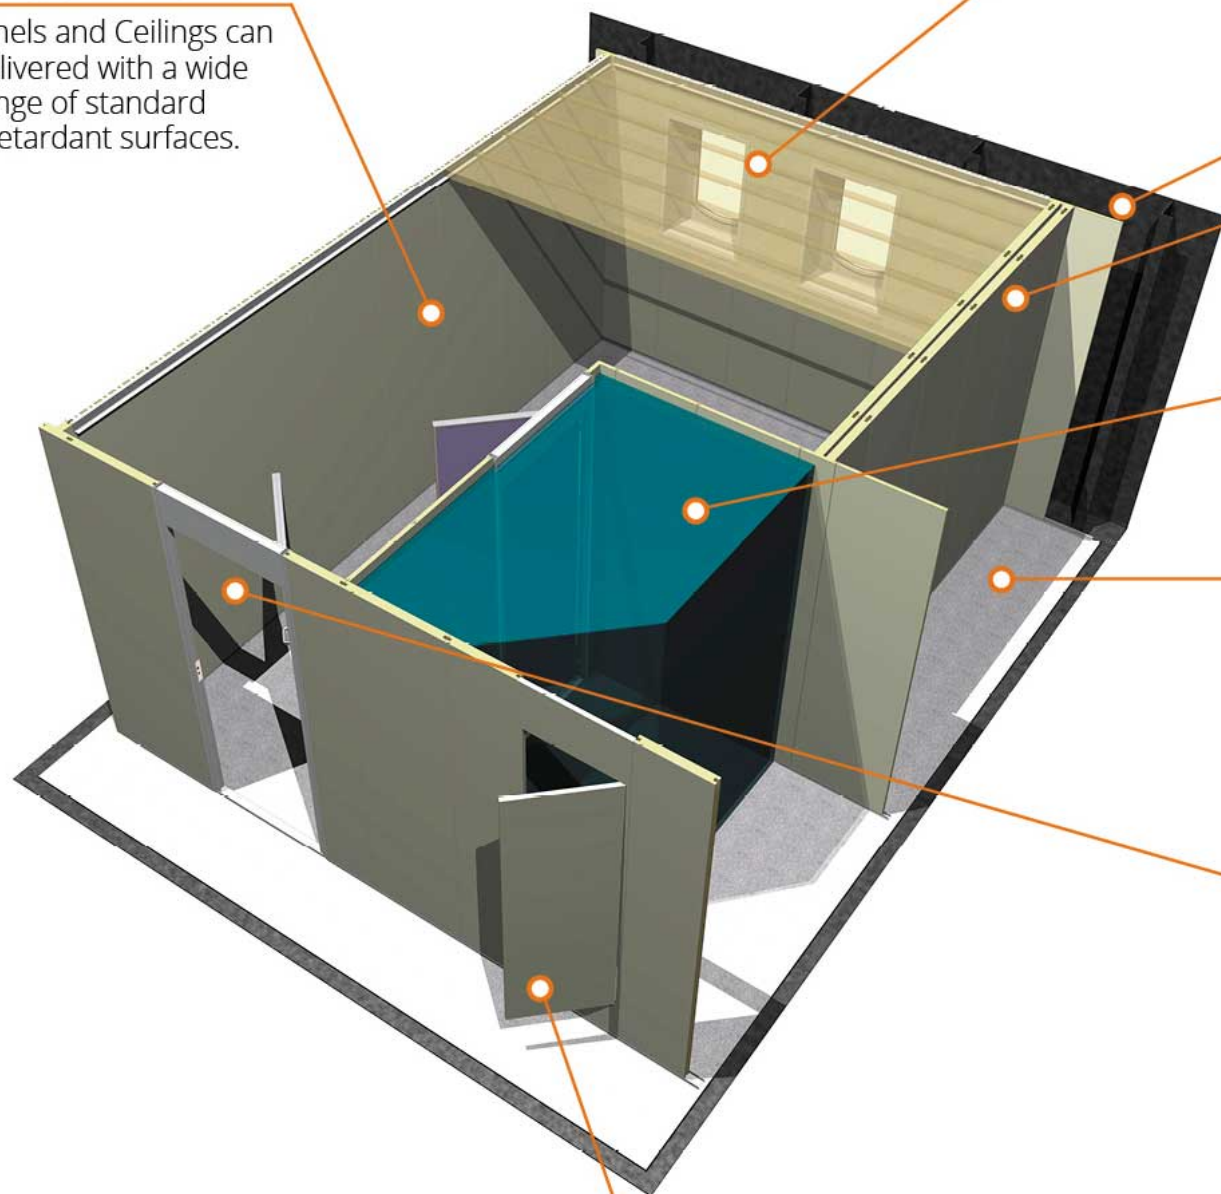

TNF
Inexa

THE ORIGINAL MARINE ACCOMODATION SYSTEM

WELL (AND SAFELY) BEGUN IS HALF COMPLETE

TNF SURFACES

TNF Panels and Ceilings can be delivered with a wide range of standard fire-retardant surfaces.

TNF CEILING SYSTEMS

TNF Inexa offer 12 types of Ceiling Systems. It means a Ceiling System for all needs and wishes.

TNF PARTITION AND LINING PANELS

The TNF 2S Wall System offers total flexibility and the shortest installation times in the market for panels in thickness of 25 and 50 mm

TNF HIGH NOISE REDUCTION DOUBLE WALL SYSTEM

For high-class Cruises we recommend the use of double walls throughout the ship (70 mm total thickness including 20 mm air gap). TNF fulfill Comfort Class 1.

TNF WET UNITS

The TNF Wet Units are made according to customer specifications or as standard units for all kinds of environments in ships, including applications on land, like hotels.

TNF FLOATING FLOOR SYSTEM

The TNF floor units FS7 and FS5 consists of a specially developed insulation material surfaced by a 2 mm thick steel plate.

TNF B- AND A-CLASS DOORS

TNF Marine Fire Doors can be equipped with all the required components and a large variety of surface finishes are available.

TNF HB6 INSPECTION DOOR

The TNF HB6 inspection door is designed as an integrated part of the TNF 2S Wall Panel System. The HB6 inspection door is primarily used for access to service sanitary units.

TNF JIT CABINS

TNF are able to offer modular prefabricated cabins as assembly kits according to our TNF JIT Cabin concept

THE CONCEPT

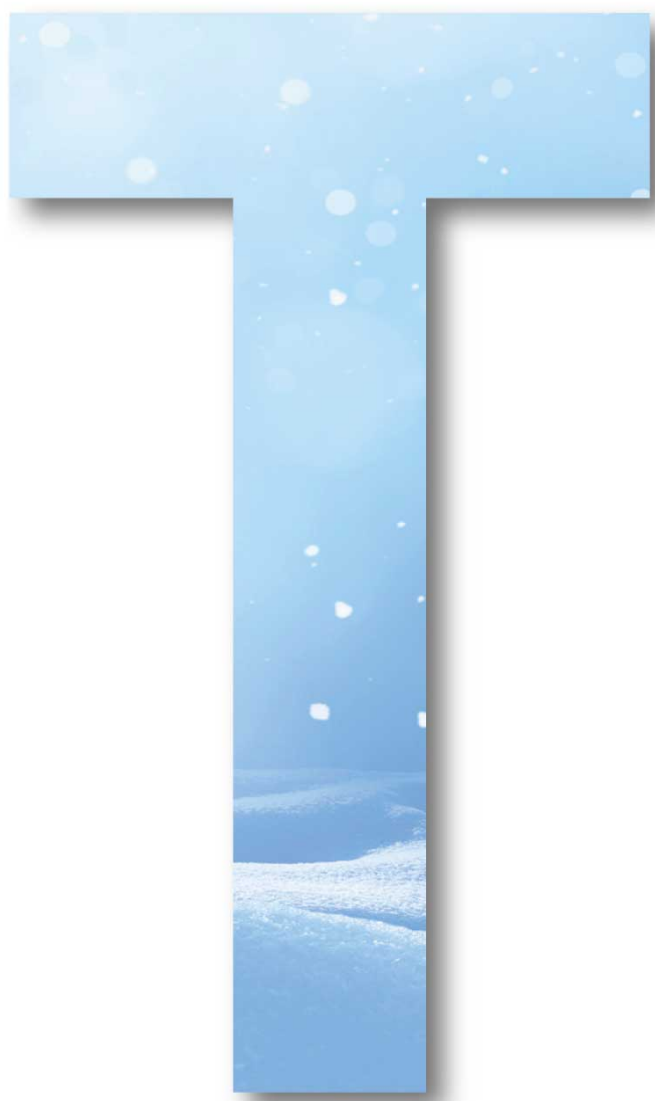

Our strategy is quite straight forward. We concentrate our resources and energy on the shipbuilding industry. This is our core business and we know it like no one else in the world.

By continuously monitoring our environment, by listening to our customers and paying attention to the smallest of details we are constantly improving on an already strong market position.

INEXA TNF PANEL manufactures the highest quality panels in the industry. This translates simply into an easier and faster installation job and a consistently more attractive cabin.

Our modular system was the first in the industry and joiners rate our system second to none in simplicity. In brief our concept means that a complete package of pre-fabricated, customer-specified panels is delivered to our customer, ready to install.

Our goal is also straight forward. We aim to become a true partner to our customers, acknowledged for our commitment, product quality, product development, delivery performance and unparalleled customer service.

THERMAL

Thermal insulation – TNF panels provide sufficient thermal insulation.

NOISE

Noise reduction – by using the TNF panels a significant noise reduction will be obtained.

FIRE

Fire protection – TNF Panels & Ceilings complies with IMO regulations. EC-MED  certificates are available on request.

DESIGNED AND DEVELOPED IN SCANDINAVIA FOR BEST QUALITY

TNF has been leading the development in marine interiors since 1973.

The world famous TNF quality is demonstrated in the environment, which can be designed to provide the ideal conditions for all functions.

PRODUCED AT OUR OWN FACTORY IN CHINA FOR BEST PRICE

The main goal for moving the TNF production to China in 2006, was to maintain competitive prices but still having the Scandinavian designed and developed products produced in a high and well known quality.

We think we succeed, as we are still competitive and still having focus on the quality.
